Participants will learn:

- Membership recruitment techniques
- How to obtain the right mix of people on your coalition
- How to raise concern and increase support for your coalition’s cause
- How to use leadership skills to create infrastructure
- How to integrate efforts aimed toward the same goal
- How to utilize and build upon existing resources and experiences in the community
- How to build upon knowledge, skills and strengths in a community
- Good habits for conducting coalition meetings
- Ways to encourage individuals to stay involved
- How to motivate people to ward the end goal
- How to reward and recognize coalition members

We are in this together; helping your coalition succeed!
Driving Data for Peak Performance: Substance Abuse Prevention Using the Strategic Prevention Framework Approach

This training will increase your understanding of the value and limitations of data and maps including:

- The relationship between data and maps
- How to interpret and apply data and maps as it relates to prevention
- How to identify which characteristics describe your area
- How to identify where characteristics are most pronounced

During this training we will review data relevant to prevention including:

- The ATOD school survey
- Afternoons R.O.C.K. in Indiana
- Demographics
- Risk and protective factors

Participants will work through a data/map exercise and explore its use in assessment, planning and sustainability.
