GIS in Prevention, County Profiles, Series 8 (2011)

PREV-STAT™ enables the user to understand the characteristics of a place, to locate a group of people with particular attributes, or to study a subset of the population of a given locale. Analysis can be done at any level from state to county, block group, zip code, neighborhood, or based on any arbitrary selected boundaries. Alternately, a radius can be drawn around a site (e.g., a school, place of worship or prevention program) to be studied. The greatest power of PREV-STAT™ is its ability to zoom in on the very small geographic area! PREV-STAT™ enhances many areas of prevention, including needs assessment, program planning, marketing and evaluation. Call the IPRC to learn more about this valuable service.

To obtain a custom report, learn more and place a request see:
http://www.drugs.indiana.edu/prev-stat/customized-report. Your report will be ready in 3-6 weeks. You may only request one report at a time, and demand may limit the number of custom reports per person per year.
